

## **Ohio Recycling Laws**

Scrap dealers must maintain a record of all transactions that must include a copy of the seller's driver's license and the license plate number of the seller's vehicle.

Scrap recyclers must make payment by check for the purchase of special items, such as street light poles, covers and street signs. They also must obtain a photo of the special purchase item for their records and there is a two-day tag-and-hold policy for these items.
